

**Mini solenoid valve 15 mm**

Ordering code

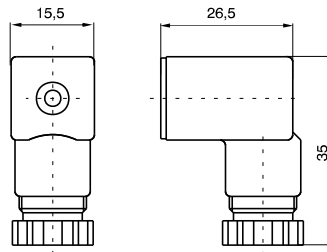

**N221.0F**

**Technical characteristics**

|                     |  |
|---------------------|--|
| Fluid               | Unlubricated filtered air                  |
| Pressure (bar)      | 0 ... 6                                    |
| Function            | N.C.                                       |
| Flow rate (NI/m)    | 185  |
| Operating voltage   | 24 VDC                                     |
| Power               | 4 Watt                                     |
| Class of insulation | F (155 °C)                                 |
| IP Rating           | IP65 (with connector) - IP00 (with Faston) |
| Temperature (°C)    | -5 ... +50                                 |
| Weight (gr.)        | 35.5                                       |
