

TECHNICAL DATA SHEET

PMAFLEX Multilayer - XTPC - Corrugated Conduit

Highly flexible, medium-duty

Highly flexible conduit for robotic applications with high resistance to abrasion and wear indication function. Especially suitable for narrow bending radii

Applications:

• For dynamic conduit systems in robotics and automation industry

Features & Benefits:

- · With wear indication function
- · High resistance to continuous bending
- No abrupt conduit failure due to high tear propagation resistance
- · Very high abrasion resistance
- · High resistance to torsion
- · Suitable for tight bending-radii
- · Long service life

Materials:

· Outer, intermediate and inner layer made from High-grade, specially modified Thermoplastic copolyester elastomer

Compatible with:

- PMA Automation Products
- PMAFIX Pro, PMAFIX fittings
- PMAGRIP flange
- PMA Accessories

Temperature range:

• -40°C ... +105°C continuous, +150°C short-term

Weathering resistance:

· Good UV resistance and weathering characteristics

Colour:

- Outer layer: black (protection layer) abrasion and UV resistant
- Intermediate layer: yellow (warning layer)
- Inner layer: blue (wear limit reached) conduit should be replaced

Chemical properties:

• Please refer to www.pma.ch (Technical Information / Chemical Resistance)

Environmental properties:

- · Free from halogens and cadmium
- · RoHS and REACH compliant
