

CR 20

CRM & CRF

CR20 single coding pins
CRM/CRF double coding pins

Each series of connector inserts is made in such a way as to make incorrect coupling between inserts of different series impossible.

When a number of identical connectors with different functions are mounted closely together these must be selected in such a way as to prevent the coupling of a mobile part on a non-corresponding fixed part and consequent damage and breakdown.

Code pins are supplied to apply in place of the normal insert fastening screws (see example below).

In this way the coupling of identical connectors is assured. The combination of code pins makes it possible to obtain a high number of selective couplings.

CR20 single coding pins

CRM & CRF double coding pins

Single coding pins for 6 codings

Part No. **CR 20** Stainless Steel

Part No. **CR 20 CX** Stainless Steel
(for Mixo inserts only)

CR 20**CR 20 CX**

Application with single insert

- code pin
- + normal fixing screw
- M = male insert
- F = female insert

Also suitable for applications with double inserts

Double coding and guide pins for 16 codings

Part No. **CRM** Male Pin Stainless Steel

Part No. **CRF** Female Pin Stainless Steel

Part No. **CRM CX** Male Pin Stainless Steel

Part No. **CRF CX** Female Pin Stainless Steel
(for Mixo inserts only)

CRM**CRF****CRM CX****CRF CX**

Application with single insert

- Male code pin
- Female code pin
- + normal fixing screw
- M = male insert
- F = female insert

Also suitable for applications with double inserts
